International

SANTA MONICA, CA

THE CONFERENCE

This year's conference will be the best ever, featuring a bilingual theme that focuses on the U.S. Hispanic Market, as well as international novices and professionals interested in the fields of High Definition Digital Audio for Music, Motion Pictures, TV & Radio.

TARGET ATTENDEES: musicians, producers, recording & mixing engineers, Sound & music editors, voice-over talents, DJs, remixers, broadcast engineers, and students, coming from United States, Mexico, Central & South America, and Spain.

Goals

- To give an opportunity for "hands-on" experience using the new digital equipment live on stage.
- To educate and train the attendees on using audio products and equipment properly, whether these are products they currently own or ones they plan on purchasing.
- To gather audio industry professionals, manufacturers, consumers, and the industry's top experts in their fields, in a conference/exposition venue.
- To provide exhibit and merchandizing opportunities for High Definition Digital Audio technology and related products, software, and services to the Hispanic Market for hands-on training application.
- To provide forums and presentations of the uses of these audio applications from experts.

Topics

- Music Production
- New Tools For Music Production
- New Trends in Studio Design For Music
- Live Sound
- Post Production
- DJ Techniques
- Music On the Internet
- Digital TV and Radio
